Stock Spread Calculator is a user-friendly financial calculator designed to help you make sound financial decisions regarding the buying and selling of stocks. Stock Spread Calculator is an add-on for Stock Trader's Calculator. The patented

---

Stock Spread Calculator uses sophisticated and intuitive mathematical concepts to quickly and easily produce accurate net profit and commission results. Easy-to-Read Windows-Style Interface The user is presented with an easy-to-read Windows-style interface. Just enter price and quantity, generate

---

the required numbers using the "calc" button and let the program do the rest. Requires: Microsoft Windows® - version NT-2000, XP, 2K, Vista or 7, 8, 10. Do you know how a real trader calculates net profit on a trade? Well, I have done it over and over again. I have always been a person that likes to

---

actually do the transaction rather than simply doing the math. This is the same reason that I have created Stock Spread Calculator. As a past software developer I have developed many programs, over 200 to date. I wanted a program that actually did something worthwhile. I wanted a program that

---

actually connected me with the owners, such as real traders. I have gone so far as to calculate spread for other traders as well, just so I can say, "I actually read your mind!" You don't have to worry, all data is kept secure. My hope is that you will find Stock Spread Calculator easy to use, accurate, and

---

valuable in your own trading. In addition, Stock Spread Calculator has been designed to provide an easy way to keep track of profit, net profits, and commissions. If you like spread sheets, then this will be even more interesting for you. Because I want this to be valuable, I have also

---

provided the ability to do the following. 1. Start with an initial guess for the spread. 2. Add and subtract spread with each transaction. 3. Display net profit with the press of a button. 4. Display net profit and commissions with the press of a button. 5. A function for finding spread when you already

---

know your buy and sell prices. 6. A function that allows for trade accounting for systems that do not allow commission and commission to be taken off for open trades. 7. A function that allows the trader to log in to an account and generate stats for their trades. 8. The ability to easily look

---

up

**What's New in the?**

Stock Spread Calculator is a Windows desktop application that calculates the net profit of a stock option transaction based on purchase and sale prices and number of shares. Stock Spread Calculator is a user-friendly
